
Title: Installation of Wireless Access Points

Page No: 1 of 1

Date: 2-12-2003

Revision:

Purpose Statement: The purpose of this policy is to insure the security and reliability of the University of Tulsa data network.

Scope of Policy: This policy applies to all wireless access points connecting to the University of Tulsa data network.

Definitions: **Wireless Access Point (Wireless AP)** – A device that provides interface with the network by means of a standardized air interface protocol without the use of a hardwired connection to the network.

Policy: Only University provided access points that provide University services may be connected to the University of Tulsa data network. The wireless access point must be approved and installed by the Information Services Data Networking department.

Procedure: To request wireless access in a specific area or building submit a helpdesk work order to Data Networking for survey, quote, and installation of wireless access points.
