

TU Talk

ACAC - Pronounced "ack-ack," this is the acronym for the Allen Chapman Activity Center, which is also known as the activity center, a.k.a. the "activity center" the "union", or the "student center", but is not to be confused with the new Student Activity Center in the apartments. ACAC is the University's hub of activity. The building is laptop wireless, has a computer lab, a gourmet coffee kiosk, and lots of quiet corners--all making it ideal for "studying", or actually studying. With full-service postal operations, an ATM, a Bookstore and Gift Shop (nifty TU threads), the student body government offices, and restaurants and meeting space, you can't help but run into your friends here. Spend some time getting to know your way around this building. It will be an important part of your time spent at TU.

Chapman Center for Communication Disorders, the newly renovated H.A. Chapman Stadium, the Chapman Commons on Tucker Drive--which is the new entrance to TU from eleventh street, and the Chapman Theatre in Kendall Hall. Laundry Tips (No Pink Socks)

When doing laundry, if you remember a few basics, you'll avoid changing the colors of your favorite clothing.

1. Before washing, separate your laundry according to color: all whites, all pastels, and all darks together.
2. Check the water temperatures on the washing machine and adjust as follows: hot for white; warm for pastel; cool for dark.
3. Unless you want splotches on your dark and pastel items, use bleach ONLY on whites. Use the correct amount of bleach.

Wrinkle Avoidance

To avoid massive wrinkles, remove your clothes from the washing machine as soon as they're done, and place in the dryer. When clothes are dry, fold them as soon as you remove them from the dryer.

Tornado Tips

Weather Advisory Broadcasts

Tornado Watch: There is a chance of a tornado forming.

Tornado Warning: A Tornado has been seen or detected by radar.

Tornado Warning Checklist

Keep calm. Keep your radio on for weather information. Seek inside shelter in a tornado cellar, underground excavation, or steel-framed or reinforced concrete building.

In residence halls or campus buildings: Move to the designated shelter area or the basement, or stand in an interior hallway on the lowest floor.

In shopping centers: Go to a designated shelter area or move to the lowest floor into small shop areas.. Do not go to your car! Stay away from structures with wide free-span roofs.

Outdoors: If you are in a car, stop and get into a protected shelter, get into a ditch and lie flat, if no shelter can be found. If you are out in the open, find a ditch or depression, lie flat, and protect your head. Stay away from downed utility wires.

Lightning is Dangerous Too

Indoors: Stay away from electric appliances during storms.

Outdoors: Stay away from conductive objects, seek shelter in a substantial building or in a fully enclosed vehicle with the windows completely shut. If caught outside when lightning is striking nearby, crouch down with feet together and hands over ears to minimize hearing damage from thunder.
